# Hi! My name is Saloi Akeza.

I am a codeHive student.

About Me.

I started learning at AkiraChix from february 3rd this year and throughout the four weeks, I have gained a lot of new skills about frontend web and mobile development, data structures, quality assurance, product management, ux/ui design and research.

In Frontend Web class, I learnt to use a new language called HTML (Hyper text Markup Language). Where the trainer explained for us :

- Basic commands to create a website like this one
- How to deploy a website
- How to create a login ui using forms in an html file
- How to use github to keep and upload all your work on

The trainer also influenced me to self-train and practice

- Using tables in html
- Designing a sign-in ui page and link it to the official web page

In Frontend Mobile class, I learnt a new programming language mostly used in apps called Kotlin. The trained helped me understand:

- Basic git commands used in linux terminal.
- Variables and datatypes used in Kotlin
- Operators used to manipulate the mentioned variables

In Ux Research class, I learnt a lot about different companies and how they make their user experience research to benefit their market. The trainer helped me understand more about:

- Types of research and how to make use of them
- Different research methods used by companies like Twiga foods and Spotify
- What HCD is and how it should be implemented in a company

In Ui/UX Design class, I learnt about how to use different shapes to come up with a nice and presentable design. The trainer helped me understand more about:

- The difference between art and design
- Elements and principles of Design
- How to draw a lesso using simple geometrical figures
- How to represent yourself or anything else using geometrical figures

In Quality Assurance class, I learnt a lot about:

- What a QA does in a company.
- Different QA models used for different companies
- Different steps involved in ensuring quality
- What test cases are and their types

Goals & Ambitions!

My childhood dream was to become a famous author and travel around the world!

Later on in life I got inspired by the marvelous power of technology in creating beautiful things.
Now I aspire to become a woman in Tech!

That's all from me!

I'm open to any questions ?
